

# Green-e® Climate Certified Carbon Offsets

BEF Carbon Mix

## CARBON OFFSET CONTENT LABEL

### Net Zero Carbon

This carbon offset content label, provided for every purchase, explains the type, location, and certification method for each greenhouse gas emission reduction project that is a part of your retail offset purchase. It is a simple, transparent way for you to be certain your purchase is resulting in real environmental benefits.

Project Type	Project Validation	Project Location	% of Product
Landfill Gas Capture	Verified Carbon Standard or Climate Action Reserve	United States	100
The emission reductions supplied will be created:2016-2018			

\*The percentages listed are prospective. Actual figures may vary.

For more information on how much they can vary and calculations for emissions see *Price, Terms & Conditions*.

Mid Atlantic State includes: Maryland, Pennsylvania, Delaware, Virginia, North Carolina and Washington DC

The year after your Net Zero Carbon purchase, you will receive notification about the total number of carbon offsets that you purchased in the previous year through BEF Carbon Mix.

View the current project list at [www.b-e-f.org](http://www.b-e-f.org) or contact us

*Bollinger Energy Net Zero Carbon has partnered with BEF to sell these Green-e® Climate Certified carbon offsets. The offsets you purchase are supplied by BEF rather than by Bollinger Energy.*

Green-e® Climate is an independent certification program for greenhouse gas emissions reductions (carbon offsets) sold in the voluntary market. The Green-e Climate logo identifies carbon offsets that meet the program's high environmental and consumer protection standards. For more information on Green-e Climate certification requirements, visit [www.green-e.org/climate](http://www.green-e.org/climate)

or email [climate@green-e.org](mailto:climate@green-e.org).

# Green-e® Climate Certified Carbon Offsets

## Price, Terms & Conditions

These carbon offsets represent the reduction of a specific quantity of greenhouse gas (GHG) emissions. By purchasing these offsets, you alone have the right to all associated claims about the environmental benefits they embody. Carbon offsets are to be regarded as a real environmental commodity, not a donation or investment in a future emissions reduction project. The verified GHG emissions reductions you purchased are sourced from projects that have been validated and registered under high-quality project standards.

Carbon Offset	Quantity	Price	Billing
Net Zero Diesel Fuel	MT CO2e	\$5	see below

\*About \$0.05 per gallon of diesel fuel, 22.5 lbs of CO2e per gallon @\$5/mT, about \$0.045 per gallon of gasoline, 19.6 lbs of CO2e per gallon

The greenhouse gas emissions being offset with Net Zero Carbon Diesel Fuel are those associated with the combustion of the fuel at the point of consumption only, and do not include lifecycle emissions that occur during extraction, production, or delivery.

Billing – Customer will pay for 100% carbon offsets for diesel fuel use with their monthly bill, Bollinger will then report, at a minimum quarterly, to Bonneville Environmental Foundation (BEF, a 5013C) for offset purchases and retirements.

A range of years as the vintage indicates that offsets will be delivered over time, and so the vintage of the GHG emissions reductions will fall within this range and not exceed the year of delivery.

The Carbon Offset Content Label represents the mix of project types, locations, and verification programs that will be used to supply your offsets. The actual percentages or metric tons of GHG emissions reductions by type may vary by a small percentage. In the case of a significant variance, the Seller of the Certified Offsets is obligated to provide you with more accurate historical disclosure. For more information see the Green-e® Climate Code of Conduct available at: [www.green-e.org](http://www.green-e.org)

The length of this contract is yyyy/mm/dd-yyyy/mm/dd
